

The Department Polymer Engineering and Science Leoben and the
Polymer Competence Center Leoben PCCL invite you

Wednesday, 1. February 2017, 11 Uhr s.t.
Room: WPK-Meeting room, Otto Gloeckel-Str. 2, 2nd floor

Short polymer fibres research at Deakin University: new opportunities for collaboration?

Dr. Alessandra Sutti

Senior Research Fellow
Institute for Frontier Materials, GTP Research
Deakin University, Geelong, Australia

Dr. Alessandra Sutti is a Senior Research Fellow at the Institute for Frontier Materials, where she leads a team of 18 people, focused in short polymer fibre research. Alessandra moved from Italy to Australia in 2007, pursuing an academic career in nanomaterials science. Her work pivots on the development of novel fibre manufacturing technologies, and of novel materials and applications based on short polymer fibres, including biomedical applications.
